

EYELINER AFTERCARE

Healing Time
28 days

what not to do

No eye makeup or contact lenses for the next 6 days.

No swimming for 2 weeks.

Avoid sun exposure for the next 4 weeks.

Do not pick or peel at flaking skin.

what to do

Wash your face gently over the next 6 days, but avoid scrubbing the eye area. Pat dry with clean paper towel or tissue.

Apply Aquaphor to the treatment area twice a day or as needed for the next 6 days using a clean Q-tip.

You may ice your eyes as needed, but no more than 10 minutes at a time and do not allow condensation or moisture to accumulate on the treatment site.

You may return to your regular makeup routine on day 7.

It is recommended that you cleanse all makeup brushes and pencils before returning to your regular makeup routine to avoid introducing bacteria from old products to the treatment area.
